

CSIS 1280 Lab 10

Please complete the tasks described below.

- Please follow the good programming practice and proper indentation as mentioned in the class
- Show your finished work to the instructor or the lab assistant before you leave the classroom.
- Save your completed work in your personal drive. You may need the lab for further exercises/assignments.

Part1

Create a page (named as lab10_part1.html) that has a table as shown in the image below. The first cell in the first row contains radio buttons while the second cell in the first row is spanning two rows (that has an id like “target” for example). The first cell in the second row contains a select input. Note: you can use any color selection for the radio button and select options.

Change font color <input type="radio"/> Red <input type="radio"/> Blue <input type="radio"/> Green	CSIS 1280
Change background color <input type="text"/>	

Write JavaScript function(s) such that when one of the radio button is clicked, the font color of the target element is changed according to the color value of the radio button. In addition to that, also create JavaScript function(s) that will change the background color of the target element according to the value of selected options of the select input

Change font color <input type="radio"/> Red <input checked="" type="radio"/> Blue <input type="radio"/> Green	CSIS 1280
Change background color <input type="text" value="Red"/>	

Part2

Look at the demo_animation and UnicycleCache html files. Use the puppy images to create an animation of running puppy from the left of the screen to the bottom right of the page. The puppy should start from the left and some distance below the text and continue to move to the right and bottom of the page. Note, the animation should start when the page is loaded. There shouldn't be any button to start or stop the animation. Name your html file lab10_part2.html.
